Professional Summary

Computer Science and Artificial Intelligence student with a strong foundation in C++, Python, Java, Object-Oriented Programming, and Data Structures. Skilled in problem solving and web fundamentals using HTML, CSS, and basic PHP. Passionate about Machine Learning and eager to contribute to real-world projects while continuously developing technical expertise.

Education

Bachelor of Computer Science and Artificial Intelligence 2024 – 2028
University of Sadat City
GPA: 3.5/4.00

Courses & Training

Microsoft Machine Learning Engineer — Digital Egypt Pioneers Initiative (DEPI) 07/2026 – Present
Training in Machine Learning and AI with a focus on developing practical ML engineering skills.

AI & Machine Learning Program-Sprints & Microsoft 06/2026 – Present
Training in AI and Machine Learning fundamentals with hands-on practice.

Web Development Fundamentals-Elzero Web School 01/2026 – 03/2026
Covered HTML, CSS, JavaScript, and PHP fundamentals.

ICPC Training Course Level 1 Phase-ICPC USC Community 02/2025 – 08/2025
Training in algorithms, data structures, and competitive programming.

ICPC Training Course Newcomers Phase-ICPC USC Community 11/2025 – 06/2025
Covered programming fundamentals, algorithms, and problem-solving.

Projects

Water Level Indicator Model
Designed and simulated a water level monitoring system using BC547 transistors, LEDs, resistors, and a buzzer. Performed circuit design, component integration, and testing.

Restaurant Database Management System
Developed a Microsoft Access database to organize restaurant operations and efficiently manage records.

E-Commerce Website UI/UX
Designed a user-friendly UI/UX for a clothing e-commerce website, focusing on intuitive navigation, product presentation, and responsive layouts.

E-commerce Website
Developed a responsive e-commerce website for a clothing store, featuring product browsing, user authentication, shopping cart, and order management using HTML, CSS, JavaScript, PHP, and MySQL.

OOP Game | C++
Developed a multi-level game using OOP principles, featuring player and enemy classes with unique powers, dynamic level progression, and win/lose conditions.

Technical Skills

Programming Languages	Core Concepts	Web Development
C++, Python, Java, PHP (Basic)	Object-Oriented Programming (OOP), Data Structures, Algorithms, Problem Solving	HTML5, CSS3, Basic PHP

Languages

Arabic Native	English B1
